- Interior Stock drawers - convenient for storing surplus products for refilling!

PPE AND CONSUMABLES VENDING MACHINES

PPE and Consumables vending machines have a proven track record of increased safety benefits and cost savings on worksites across many industries.

Utilising PPE vending machines enables your company to monitor usage, increasing accountability and discourage wastage, whilst ensuring staff/contractors have access to PPE when and where they need it.

Each range of vending machine is customisable specifically to site needs and 3 size options are available.

Implementing PPE vending machines consistently improves PPE compliance by having equipment available 24/7 in easily accessible areas and at point of use. Being easily relocatable, these vending machines can be re-positioned around site if required.

Easy to use with access by swipe card/keyring fob /chip sticker and with tracking software to monitor, report and control inventory usage.

Technical support, service, and implementation assistance provided by IQS Solutions.

IQS Solutions Range of Vending Machines delivers the reliable solution to your site.

SMALL VENDING MACHINE

IQS Solutions Range SLIM-LINE vending machine is the narrowest model we offer.

SLIM-LINE is the ideal choice for situations where there may be width limitations on access points, stairways, or limited floor space.
